01 INTRODUCTION

- Our Production Facility includes 75 plants nationwide, ranging from 30 to 130 m³ / hour, ensuring precise and compute-controlled concrete production.
- With a fleet of 60+... Concrete mixing and transport vehicles ranging from 8 m³ to 10 m³ capacity, we guarantee reliable delivery to your construction sites.
- Our 12+... Mobile concrete pumps can reach distance from 36 m to 52 m, ensuring precise concrete placement.
- Our extensive support equipment, including loaders, cement transport vehicles, generators, and water chillers, are expertly maintained for peak performance.
- We prioritize quality control in our operations, with dedicated laboratories at every station and a large central laboratory at our production facility, considered the largest in Egypt.

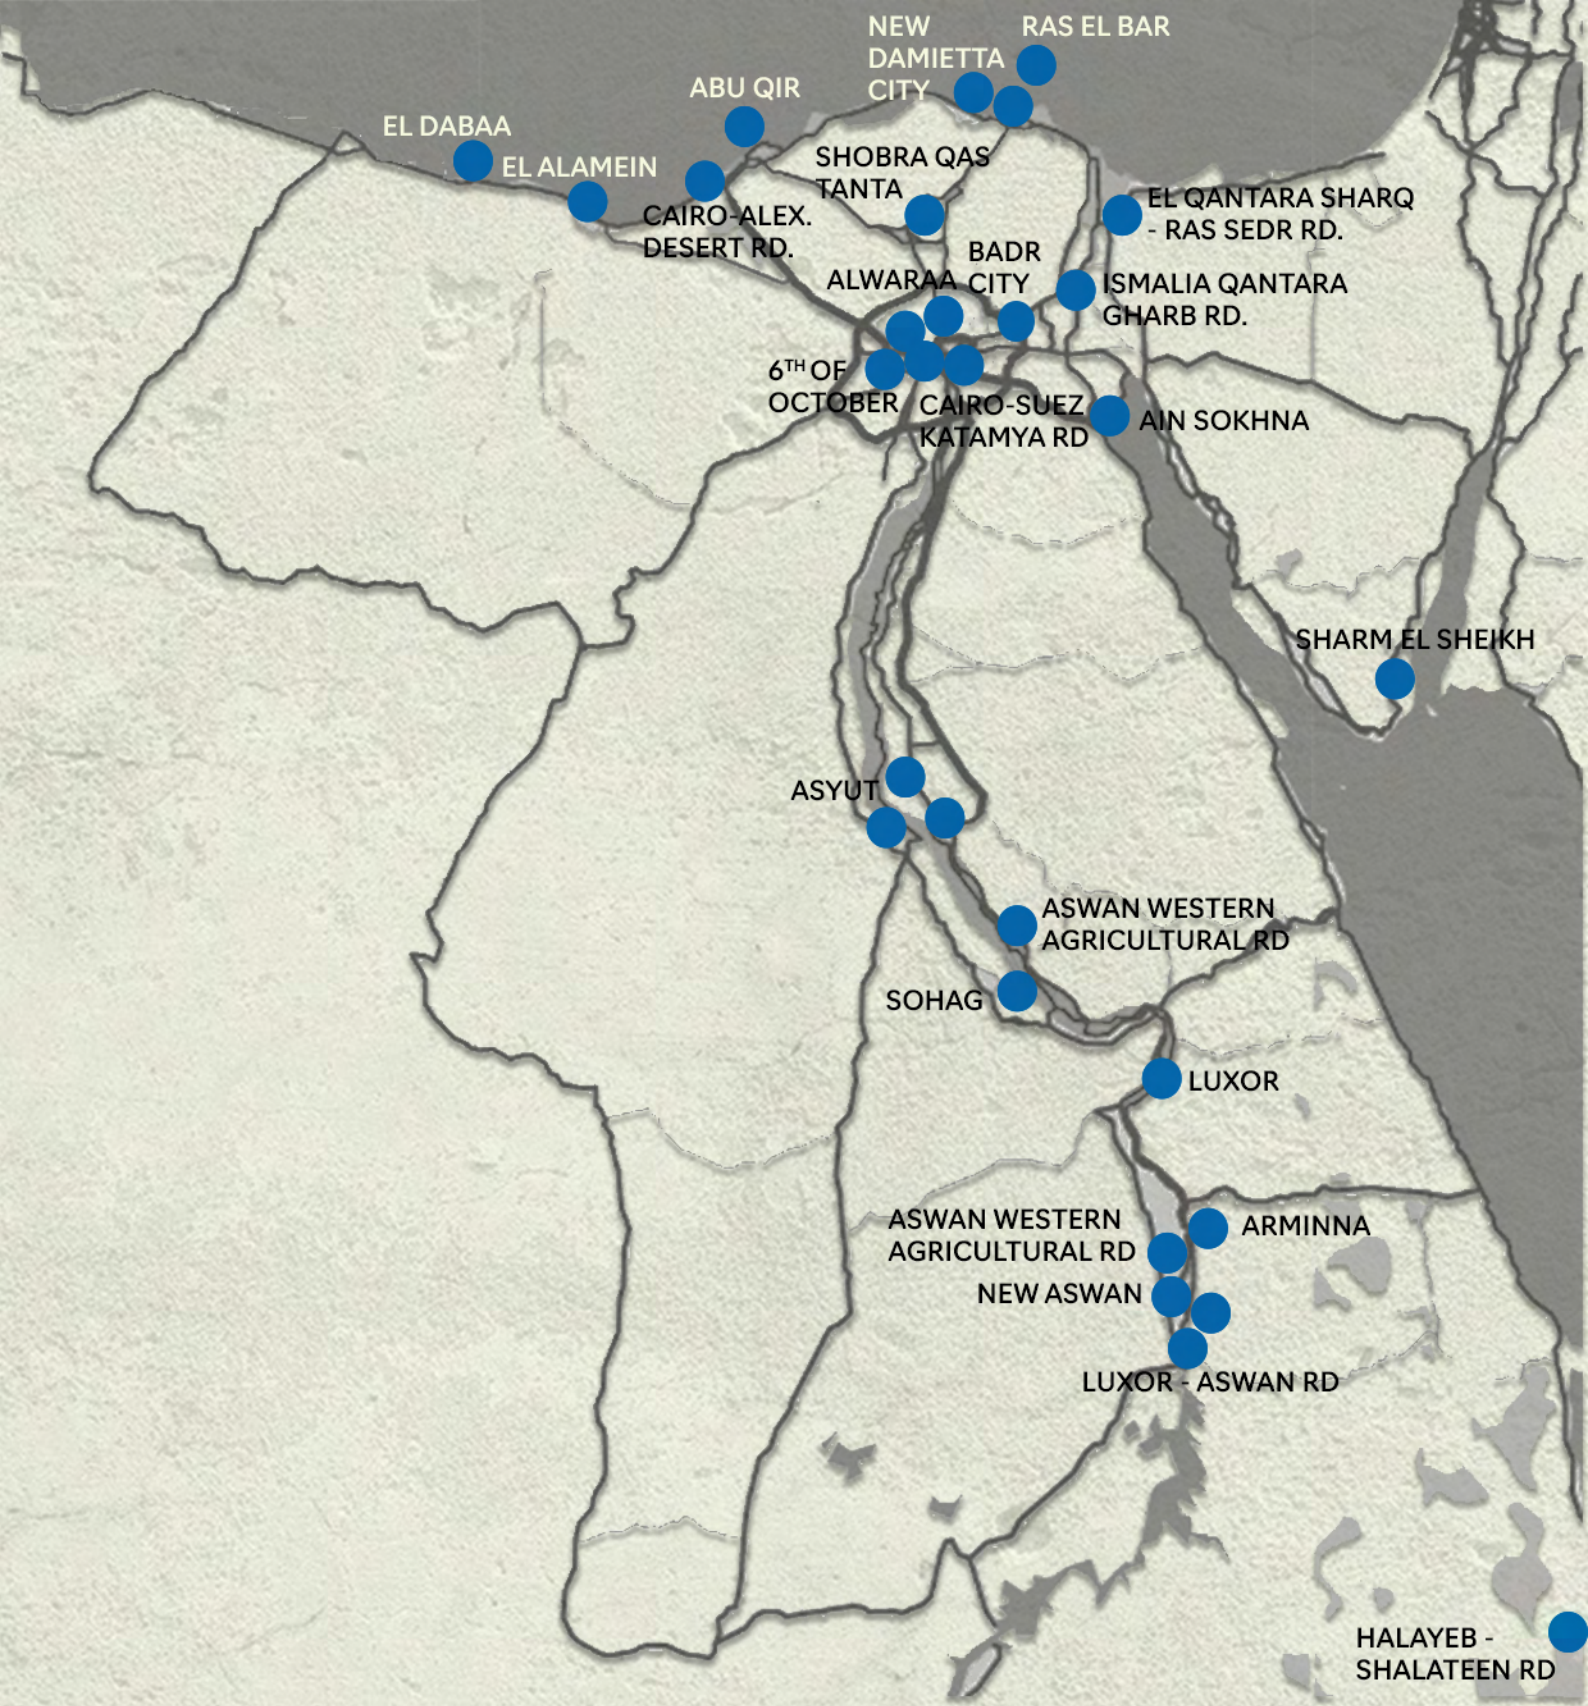

READY MIX CONCRETE

02 READY MIX CONCRETE

- Our highly qualified team ensures quality through ISO 9001 certification for concrete design, mixing, transport, and pouring.

- We provide any type or specifications:

Lightweight, heavyweight, colored, high-strength, mortar, self-compacting, fiber-reinforced, waterproof, piling, durable, basalt, corrosion inhibitors, mass, ultra-high strength, watertight, early strength, green, and high-rise concrete.
